Torres Henderson Education Resources

OUR MISSION

Our Mission is to serve programs and schools that help with the acquisition of Authentic Language, Spanish, English, Bilingual, Dual Language and English Learners' proficiency in education...We include, value and trust one another. We are smart individually, but together we are genius. This means being inclusive, equal, provided with equity and being accepting of each other. Because, in order for our youth to thrive for our future, smart isn't enough. We need genius.

1 LESSON PLAN PART I: Language Development

Language Development (Dual Language Pairs/ELD Partners) HOTS: Analyze, Evaluate, Create
 In this section of the lesson there are two options for paired/shared learning with partners or small groups; Option 1 is always questioning strategies and Option 2 is always a TPR/Storytelling/Role-Play activity; The teacher should select based on time allowed in the lesson cycle-choose the one that works best for the schedule. Try to vary this with each new theme to give the students the

Pairs/Partners Option 1: Questioning Strategies
Questioning Strategies/Question of the Day (Daily)
 In pairs, students will decide on the answer to the question of the day and then

- Who:** Who do we share with?
- What:** What things can we share with our family? What can we share
- Where:** Where do we keep our toys and games?
- When:** When have you shared with a friend? What did you share?
- Why:** Why do you think it's important to be kind to others?
- How:** How do we take turns?
- Discuss:** Discuss with your partner what are your three favorite games/toys and why.

Pairs/Partners Option 2: TPR/ Storytelling
 Students will role-play sharing their favorite toy (brought from home) with a classmate. The pair will pretend they are getting along and don't want to share. The teacher will ask the class to help them solve their issue. The pair will use those suggestions and resolve the argument to share their items. Allow various students to try this activity with the scenario with toys, games, food, pets, clothes, and shoes. Suggestions: chart the class input onto a visual chart. Review the suggestions after their role-play.

• Theme
 • Key Vocabulary

ENRICHMENT: Refer to the task card for the Learning Center Option marked above, or use the T-H-E games here.
Lesson Plan Support Suggestions: Parent Connection
Parent Connections: In this section of the lesson, teachers may select ways to incorporate family members into the lesson.
Suggestions: Parents may donate food items for the soup activity; Parents may participate in the game; Parents should be invited to hear the story and participate any way they can to help with the lesson.
Evaluation: Work from Centers may be used for portfolio analysis. The teacher is encouraged to use the centers throughout the lesson and encourage use, watch for understanding of the theme the given skill. A journal will demonstrate growth over time in writing and following instructions as well as comparing and contrasting.

Lesson Part 2: Centers
 Select 1 or all of the 3 learning centers

• Select the Centers you can do!
 • Do 1 or all 3! Get your Templates in PDF format on the teacher's USB for lessons.
 • Look out for the center that has the Task Card included!

Parent Connection tips, and Evaluation Strategies!

• Use the games included in the kit and the classroom library to further enhance the instruction. They can be centers-support, enrichment or independent practice.

The key to these lessons is to follow the developmental steps of the plan and then to either select or implement the three PROJECT-BASED LEARNING OPTIONS GRADES 3-5

5TH GRADE Teacher Lesson Plan English
5th GRADE | LESSON 1 - Inventions in Communication **SOCIAL STUDIES**

THEME: Inventions in Communication
OBJECTIVE:

- The student will learn about famous technology innovations past and present.

KEY VOCABULARY:

- computer, communication, email, copy machine, internet, invention, website, cell phone, typewriter, satellite, signal

Project Based Learning

- OPTION 1: Create a scientific oral report on an inventor
- OPTION 2: Write, create props, and act out a scene about a famous inventor's process of developing their invention
- OPTION 3: Present and create an instructional manual to help others understand how an invention is used

Materials Needed:

Provided PDFs for this lesson; Vocabulary cards for this lesson; Any materials provided for this grade level; Art materials.

Standards: TEKS (TEXAS)

5.b (22) (A)(B)(C)

Skills: HOTS: Analyze, Evaluate, Create

1 LESSON PLAN PART I: Comprehension Lesson Part 1: Comprehension (group)

Comprehension: In this section of the lesson, the teacher will introduce the theme of inventions with a discussion about past and present communication tools. The teacher will create a timeline using a provided library to demonstrate how communication has changed. Identify key vocabulary using images and cards.

Topic:

- Create a timeline puzzle using the word wall words and timeline. In pairs, students are to place the correct invention on the timeline in the order of its creation and match it with its inventor. Students may also write an imaginary story in their journal about how the world would be different if one of the inventions from the timeline were not created. Have them analyze the spiral effect of not having an invention such as paper and how it would affect their writing in the present day.

2 LESSON PLAN PART II: HOTS Lesson Part 2: Language Development (Pairs)

Language Development (Dual Language Pairs/ELD Partners) HOTS: In this section of the lesson, the following is the option for paired/shared learning with partners or small groups:

Students will:

- Use the art and writing tools provided to create early writing hieroglyphic drawings; then they will use the computer to create a small PPT presentation using clip art to show the advancement from past to present of written communication.

5TH GRADE Teacher Lesson Plan English
5th GRADE | LESSON 1 - Inventions in Communication **SOCIAL STUDIES**

3 LESSON PLAN PART III: INDEPENDENT Lesson Part 3: Independent Work

4 PROJECT BASED LEARNING OPTIONS: Lesson Part 4: Project-Based Learning Options Select from three options!

Independent Activities for students: Using journals or independent reading of the lesson, students have the following activity:
Students will:

- Create one of three timelines for one of the areas of communication: Written, Audio, and Visual. They are to identify key vocabulary for the timeline, create visuals, or cut and paste from Internet-free images on Google. Students will use the images, books, and support materials provided by the teacher's resources.

OPTION 1:

- Students will select an inventor and, using all the information learned, resource books, and websites, create an in-depth oral report on the inventor, the invention, the timeline, and its importance in the timelines. This activity will be supported with an outline and oral presentation in a group setting. The teacher will model the type of outline expected and provide a Blackline master from the USB to help develop the report. This is a scientific report stating facts, showing pictures, and possibly including a visual aid such as a PPT or a poster with identifying information to support the report. The presentation should last 15 minutes or less.

OPTION 2:

- Select an invention and create a scene about how the inventors involved in developing the item came together and made the invention happen. Have the students use a script, identify characters in the scenario, create props, and act out the scene. This should identify the inventor, helpers, and a timeline in which everything occurred and allow students to create scenery, props, and models to show during the scene. The performance should last 15 minutes or less. This should be presented in front of the class for a grade. A written script must be provided as part of the grade.

OPTION 3:

- The students will create a How-To user guide on an invention selected from the provided list. They will take the role of inventor and create an instructional manual for the invention. This can be as simple as paper, a pencil, a pen, or a computer. Ensure the students identify the inventor, timeline, and key vocabulary. The user guide will then be presented orally to the class as a group in a 15-minute presentation. It is important that students enjoy this and model the use of the invention. The user's guide needs to include at least five detailed steps. Each student in the group should participate in the presentation of those steps. Make sure students are not just listening but being creative with how they demonstrate the invention.
